

CHECKLIST

☐ Take a Screenshot of your Block Design.

☐ Take a Screenshot of your simulation waveforms with the output waveforms.

☐ Take a couple of pictures of your design working on the board. Make sure you get the board number in these pictures.

☐ Take a backup of all your project files to google drive or something so that you have them for later access. Best is to copy the entire Project Directory you created when you hit "Create New Project".

☐ Keep your board back in the cupboard the way you found it
